

Zero Waste Portsmouth

An Investment in Our Community

The Downtown Portsmouth Zero Waste Project

An Effort of the Zero Waste Portsmouth Community Group,
in collaboration with Green Alliance members, Tim Gaudreau Studios and EcoMovement,
and the City of Portsmouth.

The Zero Waste Portsmouth (ZWP) team has designed a unique community engagement and sustainability project that establishes a downtown recycling program in support of the City's waste reduction goals and eco-municipality resolution.

Engage and educate local students. This project will engage over 200 local Portsmouth school students in the creation of artistically-designed, permanent combination recycling-trash stations.

Bring recycling to the business district. The 15 recycling-trash stations will have visual themes celebrating sustainability such as, Alternative Transportation, Energy, Food, and the Natural Environment. These stations will be placed in strategic locations in downtown Portsmouth. In addition to the recycling-trash stations, ZWP will be launching several supporting art projects to promote recycling, zero waste and sustainability.

Invest in the sustainable future of our community. ZWP invites our community, especially our local, green businesses, to be part of this project. Participate by investing in financial sponsorship, donating materials, and volunteering.

Benefits of investing in recycling and this project:

- Public recognition of your commitment to community, the arts, and sustainability;
- Public promotion of your business through press, events, and acknowledgement on educational materials;
- Permanent acknowledgement of your business on the recycling-trash stations;
- Support Green Alliance members, Tim Gaudreau Studios and EcoMovement;
- Educate customers and employees about sustainability; and
- Puts Portsmouth at the forefront of the national sustainability movement.
